

Did you know?

According to SI's research desk, **4 in every 5** medium and large company in Pakistan is **paying more than it should** on the energy it utilizes to power its existing operations.

To tackle this issue, SI's utility advisory team has worked with numerous businesses, helping them save millions in costs. Collectively, SI has:

Identified over PKR 100 million in excessive costs borne by businesses due to poor understanding of utility regulations

Identified over 150 million in energy inefficiencies realizable through deployment of cost-effective (with payback of less than 2 years) solutions
